SKILLS

Languages: C/C++, Python, SQL (injection), Bash

Tools/Platforms: John the Ripper, Hydra, Wireshark , Metasploit, Nmap, SET, TryHackMe , HackTheBox

Soft Skills: Problem-Solving, Team Player, Receptive, Meticulous

PROJECTS

Advanced Network Vulnerability Scanner (GitHub) Jan'26

- Developed a Python-based vulnerability scanner to detect open ports, running services, and associated security risks using Nmap and socket programming
- Integrated CVE/NVD database lookup to identify real-world vulnerabilities and classify them by severity (Lo, Medium, High)
- Generated automated reports with remediation suggestions, improving scan efficiency using multithreading and optional GUI interface

Dreamer – Notes Management Platform (GitHub) May' 24

- **Developed** a streamlined notes-management platform aimed at improving personal productivity and organizing user-generated content efficiently.
- **Implemented** core functionalities using **HTML, CSS, JavaScript, Git, and GitHub**, applying version control workflows and modern web-development practices.
- **Delivered** a responsive, user-friendly interface that enhanced usability and enabled users to create, edit, and maintain notes seamlessly.

Keylogger – Educational Cybersecurity Project (GitHub) Apr' 25

- **Designed** a key-logging application strictly for **ethical and educational purposes**, focused on understanding input-capture mechanisms and security vulnerabilities.
- **Executed** the project using **Python, keyboard libraries, file handling, Git, and GitHub**, strengthening knowledge in system-level event tracking and secure coding practices.
- **Demonstrated** improved awareness of system security by documenting risks, defensive techniques, and preventive measures for protecting users against unauthorized keylogging attacks.

TRAINING

W3 Schools Jun' 25 – Jul' 25

DSA using java,

- Gained hands-on experience in core Java concepts including OOP, exception handling, multithreading, and collections.
- Applied algorithms including searching, sorting, recursion, dynamic programming, greedy methods, and backtracking.
- Strengthened logical thinking by solving real-world algorithmic challenges using Java.

CERTIFICATES

- The Bits and Bytes of computer networking — Coursera Aug'23
- Responsive web Design — *FreeCodeCamp* Dec'23
- DSA using java and C++ — 3 grades Jun'25
- Pre Security — Try hack me Dec'25

ACHIEVEMENTS

- **Cybersecurity Training & CTF Practice** – TryHackMe (Top 10% Globally) | TryHackMe Jan'26

  Top 10% global ranking on TryHackMe with 50+ completed labs 50+ day learning streak, demonstrating strong hands-on cybersecurity and threat analysis skills

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; CGPA: 7

- **S.B College, Ara**
  Intermediate - PCM; Percentage: 76% Mar' 21 – May' 23

- **Jean Paul's High School, Ara**
  Matriculation - Percentage: 84% Mar' 20 – May' 21
